CONSTRUCTION MANAGEMENT OVERVIEW

To deliver a construction contract on time and within budget, it is essential to have construction software in place to help with the smooth running of the operation. Construction software aids the construction management team as all managers have access to the data at all times via their computer or phone. They can immediately see if the construction cost is on budget, if the work is on time and information regarding employees, subcontractors and suppliers as well as building licenses and regulations. This helps to make informed decisions about the project and its progress based on facts.

Construction Management can benefit from construction estimating software, construction project management software and home building software to help keep its construction schedule and building project on track. There are so many elements to construction management from Project Management to HR & Employment Management as well as Accounting and Finance.
The FeaturedCustomers Customer Success ranking is based on data from our customer reference platform, market presence, web presence, & social presence as well as additional data aggregated from online sources and media properties. Our ranking engine applies an algorithm to all data collected to calculate the final Customer Success Report rankings. The overall Customer Success ranking is a weighted average based on 3 parts:

**Content Score** is affected by:

1. Total # of vendor generated customer references (case studies, success stories, testimonials, and customer videos)
2. Customer reference rating score
3. Year-over-year change in amount of customer references on FeaturedCustomers platform
4. Total # of profile views on FeaturedCustomers platform
5. Total # of customer reference views on FeaturedCustomers platform

**Market Presence Score** is affected by:

1. Social media followers including LinkedIn, Twitter, & Facebook
2. Vendor momentum based on web traffic and search trends
3. Organic SEO key term rankings
4. Company presence including # of press mentions

**Company Score** is affected by:

1. Total # of employees (based on social media and public resources)
2. Year-over-year change in # of employees over past 12 months
3. Glassdoor ranking
4. Venture capital raised

---

**Customer Success Report Award Levels**

**Market Leader**
Vendor on FeaturedCustomers.com with substantial customer base & market share. Leaders have the highest ratio of customer success content, content quality score, and social media presence relative to company size.

**Top Performer**
Vendor on FeaturedCustomers.com with significant market presence and resources and enough customer reference content to validate their vision. Top Performer's products are highly rated by its customers but have not achieved the customer base and scale of a Market Leader.

**Rising Star**
Vendor on FeaturedCustomers.com that does not have the market presence of Market Leaders or Top Performers, but understands where the market is going and has disruptive technology. Rising Stars have been around long enough to establish momentum and a minimum amount of customer reference content along with a growing social presence.

OF CONSTRUCTION MANAGEMENT

PROCORE®
ABOUT PROCORE

Procore is a leading provider of construction management software. Our platform connects every project stakeholder to solutions we’ve built specifically for the construction industry—for the owner, the general contractor, and the specialty contractor. Procore’s App Marketplace has a multitude of partner solutions that integrate seamlessly with our platform, giving construction professionals the freedom to connect with what works best for them. Headquartered in Carpinteria, California, Procore has offices around the globe.

“Procore is foundational to making our entire business better. With Timesheets our foreman enter accurate crew time and select correct cost codes every day. We’ve seen immeasurable improvement in accuracy of labor data.”
Brandon Lopez
Chief Operations Officer - VP of Production, ABLe Communications

“I had to spend hours assembling these cloud files, ensuring everything was aligned, then distributing them to the subcontractors. Now, it’s just a quick and streamlined process. I can create the issue, a notification is instantly generated, and every team member knows about it.”
Ross Wilkie
BIM/MEP Manager, Walsh Brothers

“Procore has helped me collaborate more effectively with the general contractor, architect, engineers, and inspectors on a city building rehabilitation project. The Request for Information, Submittal, Meetings, and Daily Log tools have assisted in streamlining communication, tracking assignments, and reducing paper consumption. Thank you, Procore.”
Adam Hendel PE
Project Engineer, City of Santa Barbara

“You’ve got your accounting people who want the balance sheet, income statement, and financial analyses. Then you’ve got your production people and construction managers making sure they’re on budget, on time, and communicating with the field. Procore provides all of that in one nice package.”
Heather Merz
Chief Financial Officer, The Burt Group

ABOUT B2W SOFTWARE

B2W Software empowers and inspires heavy civil construction companies to win more work and complete it more profitably. The company’s unified ONE Platform keeps people, workflows and data connected in real time and includes specialized elements to manage estimating, scheduling, dispatching, field tracking and equipment maintenance as well as data capture and analysis. A common source for operational data ensures accuracy and efficiency, and data flows logically across the platform in real time. This creates differentiating opportunities for construction companies to collaborate across workflows and optimize performance. B2W is privately owned, headquartered in Portsmouth, NH and has focused exclusively on software solutions for heavy civil construction sectors since 1993.

“Customer references from happy B2W Software users”

162

Les Braun
Controller, KPM Industries

“The reporting capabilities allow us to get real-time information to management and accounting more quickly and efficiently, and the month-end process has been greatly improved now that we are able to track costs in B2W Track in the exact same way as in our accounting software.”

Sean Donohoe
President, The DDS Companies

“B2W Software saves us a great deal of time in putting bids together, and has allowed us a greater level of consistency in preparing our bids. After I created my resource database, it took no time at all to start bidding on jobs. One big strength is that I am able to double-check item unit prices very simply, without having to rely on past history.”

John Fortier
President, Bacco Construction Company

“B2W has reduced the amount of time needed to estimate a project. We can now easily transfer data to our accounting system and with B2W Track, we no longer require an additional third-party software to handle field input.”

Tom Williams
Director of Estimating, P. Flanigan & Sons

“B2W Estimate plays especially well for DOT and Government bids, and the Cost Grouping Feature makes it easy to avoid mistakes such as doubling our crew costs on multi-faceted jobs.”
ABOUT BLUEBEAM SOFTWARE, INC.

Bluebeam Software, Inc. pushes the boundaries of innovation, developing smart, simple markup and collaboration solutions for design and construction professionals worldwide. Since 2002, Bluebeam Software, Inc. has made desktop, mobile and cloud-based solutions for paperless workflows that leverage PDF to enable a common data environment, improve project communication, and streamline processes across the entire project life cycle. Trusted by over 1 million individuals in more than 100 countries, Bluebeam’s solutions advance the way technical professionals work, manage and collaborate on projects digitally.

"Bluebeam software has simplified my work, making it easy to mark up plans and documents as if they were on my desk using a pen and marker. No more scanning marked up documents! I just click a button and the revised document is sent via email to my team. It has been the most valuable tool I have come across in a long time. If you are not using...

Patrick McGarry
Manager, Civic Projects, City of Carlsbad, California

"With the editing, collaboration and annotation technology from Revu, we are now presented with new opportunities for the discussions we have with professionals and collaborators that we share drawings with. It’s as if the documents have been brought to life, and this makes it much easier to communicate, analyze and review design changes along the way."

Christian Ingemann Elvang
VDC Specialist, MT Højgaard

"We love your software. Sending PDF files to our service bureau instead of AutoCAD files insures that the plots print properly, with no line weight surprises. Bluebeam has enabled our small start-up practice to defer the cost of purchasing a plotter."

Jay Adams
Principal, Adams Frasch Design

"Bluebeam Revu provides us with an easy solution. We were using another PDF software, but we discovered that Revu is the ideal solution for CAD users-it works better with large format drawings and produces a better PDF. Bluebeam allows us to easily create the PDFs our clients want. In fact, we do all of our client presentations using Bluebeam now."

Jim Grady
CAD Manager, WATG
ABOUT JONAS CONSTRUCTION SOFTWARE

Jonas Construction Software provides industry-leading business management and accounting software to their clients. Jonas’ fully-integrated solutions provide all of the tools needed to increase productivity and improve your bottom line. At Jonas, they make it easier for companies to focus on what is important - their customers, their projects and their employees. Jonas does this by streamlining their operations and giving better visibility to the entire organization. This gives your employees the tools to do their jobs better, support your customers and achieve your company goals.

“"When you have a group of companies, it is important to be able to make intercompany transactions. Jonas gives us the ability to manage and make changes that impact all five companies from one location, which is a big time saver for us.”
Daniel Damphousse
Vice President of Finance, Western Industrial Services Ltd.

“Premier is really helping with job cost reporting, profitability [and] communication from the accounting department to the project management team.”
Boyd Long
President and CEO, Turner Long Construction

“Jonas gives us the ability to keep track of each job along the way and allows us to be more proactive instead of reactive.”
Frank Calfa
President, Structural Contracting Services, Inc.

"Before we had eMobile, we were using a lot more pen and paper, which was definitely less efficient. Now, since implementing Jonas eMobile, our techs are able to complete jobs from the field and no longer have to return to the office to drop off their paperwork on a weekly basis, which has really allowed us to have access to more timely...
Ted Current
Vice President and Chief Executive Officer, Current Mechanical
ABOUT PLANGRID

PlanGrid is construction productivity software used on more than 500,000 projects around the world. The company provides contractors and owners in all construction verticals the tools to collaborate effectively and collect and manage project information throughout the project’s construction and operations lifespan. PlanGrid aims to increase team productivity by: streamlining document management and control, providing collaborators with easy access to all project information from any device, and enabling seamless collaboration. This leads to building the most comprehensive record set for the entire construction and operations lifecycle and consistently delivering on time and on budget.

199
Customer references from happy PlanGrid users

“PlanGrid Connect is designed to let companies easily build custom integrations and automate data sharing in a matter of hours, as opposed to days, weeks or even years.”
Todd Owens
Chief Executive Officer, Azuqua

“PlanGrid allows me to answer most questions on the spot. This boosts productivity and allows me to spend more time out in the field. It streamlines creating punch lists, saving time and resources. It’s an extremely useful tool to track the status of items that require attention. Being able to see punch stamps on the plans is a constant reminder that there is...”
Tony Blass
Project Assistant Superintendent, Hoar, NEA Baptist Hospital

“It’s an extremely useful tool to track the status of items that require attention. Being able to see punch stamps on the plans is a constant reminder that there is an issue that needs to be addressed.”
Tony Blass
Project Assistant Superintendent, Hoar Construction

“Assurance that the team is using the most up-to-date plans is a huge benefit. It is much easier to keep plans updated, posting RFIs, issues and redlines than the old-fashioned way with paper.”
Jenny Schnackenberg
Project Executive, Power Design
ABOUT VIEWPOINT

Viewpoint is a leading global provider of construction software solutions, serving at the technology needs of contractors worldwide. Products include: integrated Enterprise Resource Planning (ERP) solutions tailored for contractors of any size, an industry leading estimating solution, a powerful document control product, and an innovative, cloud-based, off-line mobile field solution. Viewpoint is a provider of innovative construction-specific software solutions to the global construction and capital project industries. Viewpoint creates the tools needed to improve project profitability and visibility, manage risk, and effectively collaborate with the entire project team.

“One of the features I like a lot in Field View is that you don’t have to be on Wi-Fi at all times with it. So, we’re able to just go out to the job site, pull up a drawing, being able to select a room from the set of drawings, and just putting a task to either a deficiency or punch-list item.” Pat Vogel
Project Engineer, Kinsley Construction

“Spectrum has really helped us maximize our purchasing and material tracking capabilities. Spectrum is very user-friendly and having it used across the company allows us to be a lot more detailed with how we approach jobs and a lot more intelligent about how we’re spending time and money.” Aaron Thomas
Assistant Controller, Pieper-Houston Electric L.P.

“We need to be able to control security on our projects really well and Viewpoint For Projects gives me all that control, and the audit trail is second to none.” Jason Waddell
Director of Construction Technology, Batson Cook

“I love the fact that Viewpoint is Windows-based, making it so easy to import, upload and export to other Windows programs.” Kim Bright
Contract Admin, Dennis 7 Dees
ABOUT E-BUILDER

e-Builder Enterprise is the leading provider of fully integrated, cloud-based construction program management software for top facility owners and companies that act on their behalf. The company’s flagship product, e-Builder Enterprise, improves capital project execution resulting in increased productivity and quality, reduced cost, and faster project delivery. Since 1995, e-Builder’s technology leadership and construction industry focus has provided thousands of global companies, government agencies, and healthcare and educational institutions management in billions of dollars in capital programs with solutions to improve the planning, building and operating life cycle. The company is privately held and headquartered in Fort Lauderdale, Florida.

99 Customer references from happy e-Builder users

“\textbf{We needed a system that would allow us to work smarter, not harder; a program that our architects, contractors,}\
\textit{inspectors and staff could easily use to provide a collective repository for project tracking and collaboration. Since}\
utilizing e-Builder, we can easily, and with confidence, prepare and submit reports to the District’s Bond Oversight...”
\textbf{Cathy Allen}\
Chief Operations Officer, Sacramento City Unified School District

“\textbf{With e-Builder, project costs and schedules are always interrelated. We have accurate forecasts, thus avoiding costly}\
\textit{surprises.”}”
\textbf{Michelle Dodroe}\
Deputy Director of Engineering and Engineering Technology, The City of Fort Smith

“I don’t know how much money we’ve saved by eliminating our mail costs—but it’s a lot. We’re no longer shuffling huge amounts of paper from one office to another—which was one of the key benefits we wanted to achieve with this transition. Everything is readily accessible, tracked and managed in one central repository.”
\textbf{Tim Ferguson}\
System Director Facilities Management, Hospital Sisters Health System

“As we actually buy out and administer the project, e-Builder allows us to move money from one code to another so that we can track the budget and stay online.”
\textbf{Joel King}\
Assistant Vice Chancellor, University of California, San Diego
ABOUT ASSIGNAR

Assignar is a cloud based compliance, asset and workforce management platform for highly regulated industries. Developed from first hand experience and the need to solve the challenges within a fast growing construction service provider, Assignar rapidly gained interest from stakeholders in other highly regulated industries. Assignar delivers its customers increased efficiency, transparency and significant management cost savings.

“In our search for the right solution to support our operations as we grew, Assignar was the perfect fit. The platform has made my life so much easier to manage our equipment and staff. I am able to see what is happening on a weekly or monthly basis and plan ahead accordingly.”  
Rebecca Waters  
Managing Director, Hi-Range Crane Forks

“Assignar connects effortlessly with all our supporting platforms (Finance, HR, LMS) so tracking staff, compliance, and budgets have allowed us to operate with a high-quality workforce and rapidly move into being Australia’s leader of rail infrastructure construction.”  
Krystle Divetie  
Resource Manager, Martinus Rail

“As an Operations Manager, I am on my phone 24/7, so with Assignar I can go on my phone and nominate which forms each person needs to fill out on what day, conduct site audits and inspections and contact traffic controllers and supervisors without rushing back to the office to get important site documents.”  
Bruce McKenzie  
Operations Manager, East Coast Traffic Control

“Before, we would have to call all our staff to the office, wasting a lot of time. So from a quality assurance perspective, it has become a lot easier to manage. There’s no excuses for poor communication anymore, making everyone accountable for their documents and expiries. Within minutes, we can send an updated competency matrix to our customers,...”  
Renee  
Operations Manager, Allroad Group
ABOUT AUTODESK BIM 360

BIM 360 improves construction project delivery by supporting informed decision-making throughout the project lifecycle. From design collaboration, documentation and reviews, to pre-construction, and through quality and safety and operations, BIM 360 connects the people, data and workflows on your project, so you can see the big picture and keep your projects on track.

"BIM 360 is the backbone of the project. From safety checklists to management inspections, from material checks to the administration of suppliers, everything is done through BIM 360 Field."

Jeroen Horlings
Project Manager, HFB

"The Autodesk tools enabled us to design a process to collect asset data throughout design and construction and publish it to BIM 360 Ops. The process, with the support of the software tools, helped us to achieve our goal of a fully-populated CMMS before patients walked in the door."

Chet Howard
Facilities Operations Director, Arkansas Children's Hospital

"We are understanding, preparing, and improving projects. BIM lets us rely more on faster and lower-cost lean construction techniques, like prefabrication and just-in-time delivery of material."

Harmen Bijlstra
BIM Manager, Van Wijnen

"We turned to BIM to give our teams the technology and processes to enable them to work more efficiently with greater control over project information."

Michelle Fahey
BIM Implementation Manager, JJ Rhatigan & Company

ABOUT CMIC

As an industry pioneer, CMiC delivers complete and unified ERP and field solutions for construction and capital projects firms. CMiC’s powerful software transforms how firms optimize productivity, minimize risk and drive growth by planning and managing all financials, projects, resources, and content assets—from a Single Database Platform™. With customers throughout North America, CMiC serves one-quarter of ENR’s Top 200 Contractors and hundreds of small and mid-sized construction firms, from general and specialty contractors to heavy/highway and project owners.

“As we worked through the process of reviewing different products, we realized that CMiC Cloud was the only true Software-as-a-Service (SaaS) solution for a company our size, eliminating the need for purchasing and maintaining a hosting server. We wanted all users to have a single point of access. For a company with an outsourced IT group—like...

Michelle Eastman
CFO, North Mechanical Contracting & Service

“When one of our project coordinators issued her first subcontract, she assumed that she missed a few steps or made a mistake because it only took her a few minutes to produce the entire subcontract package. Generating a complete subcontract with CMiC is a huge time saver and is allowing us to redefine other processes and give our project...

Jason Switz
Chief Financial Officer, CHASSE Building Team

“We save hours by no longer needing to track down resources because we can see what everyone is tasked with—with a click of a button. Also, we no longer have to call 4-5 different people and wait hours—or days—for their response. CMiC’s Resource Planning module took a process that once took days down to minutes.”

BJ Van Orma
ERP Strategic Director, JE Dunn Construction

“The drag/drop functionally with emails is extremely useful! With the number of e-mails and attachments that come in, it can take a lot of management - CMiC has saved us a lot of time.”

Cheri Duchrow
Miron Construction

ABOUT COSENTIAL

Cosential has been providing comprehensive CRM and proposal automation solutions for some of the world’s largest Architecture, Engineering, and Construction (A/E/C) firms. Unlike any other solution, Cosential was built by A/E/C marketing professionals with a deep understanding of your unique pain points and business processes. From key features to implementation and support, Cosential is tailored to A/E/C best practices in every way.

“Having the solutions integrated enables us to keep track of the most current information at any time.”

Terri Underhill
Marketing Manager, Rogers-O’Brien

“My favorite part of Cosential is the dashboard widgets and reporting. Cosential allows us to ensure all our departments can share and compare data points easily and make it easy for our executives to evaluate our business development and marketing efforts.”

Anthony Russ
Resource Coordinator, Consigli Construction

“Cosential is a huge time-saver when all I have to do is make one change to a project on my dashboard and it populates all the associated records within Cosential. It keeps me focused on my pipeline instead of data management.”

Chris Jacobs
Senior Market Data Analyst, JE Dunn Construction

“Cosential has streamlined our proposal process [and] made it much more efficient. I love the publisher module - we can produce profiles, project lists and resumes quickly and know that the information is accurate and consistent.”

Farrah Mote
Marketing Manager, Robins & Morton
ABOUT FIELDWIRE

Fieldwire is a mobile construction management platform dedicated to streamlining work in the field. We specialize in plan viewing and versioning, task management, issue tracking, documentation, reporting, file storage, and boosting team communication. Keep all project data in one place, online and offline, and strengthen daily team efficiency.

Fieldwire is deployed on over 200,000 projects across 100 countries, and is suitable for both local and enterprise firms. Built for web, iOS, and Android devices.

“Project owners especially love Fieldwire because they can reference it like a digital library. We can instantly share plans with clients and they can review from anywhere now that they have connectivity to the internet.”

Caitlin Haycock
Office Coordinator, Burnham Nationwide

“Fieldwire has definitely saved us time and money. The biggest advantage it brings us is customer reassurance. I can give them a timeline of our activity and they can see development via the app, and that used to be the hardest thing for customers to track before we started using Fieldwire.”

Alex Plotkin
Lead Technician, Security 101

“Forms are a game-changer for us. We’re excited to see the power of forms added onto Fieldwire’s existing plan viewing and task management capabilities.”

Curtis Brundidge
Director of VDC, Carroll Daniel Construction

“Fieldwire is absolutely saving us time because we’ve got all of our contractors on it, we can assign tasks and deficiencies to them right away. It saves us quite a bit of time.”

Mike Armstrong
Asst. Project Manager, EllisDon
Foundation Software offers FOUNDATION mobile - a web-based application that works by allowing users to enter and review timecards, job data and field notes remotely. Finally, the brand new Service Dispatch mobile lets service technicians receive notes and directions about their dispatches, log time, record materials used, send back notes and more! FOUNDATION is also available on the cloud as FOUNDATION SaaS ("software as a service").

“Because FOUNDATION runs on a Microsoft SQL database, we knew the integrity of the date-sensitive data was ensured. We also liked the user-friendly format, the complete integration between modules, and how it easily integrates with external interfaces.”

Dale Winters
Vice President and Assistant General Manager, HTH Companies

“I can read a report and pinpoint exactly what's going on in a job. It's just so key when you can't be physically out at a jobsite that could be 100 miles from another. These reports let me know in advance if we're headed into an issue, and you can't put a value on that. FOUNDATION makes that possible for me.”

Sandra Michael
Vice President, Proietto Companies

“At year end, when it came time to close the books and payroll, I was thrilled to find how easy it was with FOUNDATION. I simply had to check a couple boxes to prevent any posting back to the previous year, then close at my leisure. That was fantastic, and it was the first year, for as long as I've been in bookkeeping, that I didn't have to work the holidays.”

Jane Bryant
Office Manager, Cary & Associates Builders, Inc.

“We're happy to have FOUNDATION because they know costing and construction. And, Payroll4Construction.com is great because we can track employees on a certain job, on a certain day, and for how long. That's extremely helpful for unemployment compensation.”

Dawn Barzd
Office Manager, Barwis Construction
Since 1986, HCSS has been developing software to help construction companies streamline their operations. Today, they are recognized as a pioneer and leader in their market, serving thousands of construction companies across the nation. Year after year, they continue to innovate, refine, and expand their products as the industry evolves. HCSS’ mission is to help customers dramatically improve their business through innovative, high-quality software and exceptionally helpful service while providing a great life for employees.

"HCSS Cloud helps us in such a way that we now can ensure all of our bids get submitted, and you can't win a bid that you can't submit."

Reed Greenhill
Estimator, The Allen Company, Inc.

"The great thing has been that we can see a trend, that it's taking place, and we know we need to emphasize more training, or the training we're giving is improper, so we're able to fix that."

Harjivan Chatha
Construction Manager, Martin Brothers Construction

"It allows us to look at the leading indicators that the industry is really pushing now. Rather than gathering information after the fact and trying to hindsight things, all that information is there in real time for us to use. We can classify it and use our time to get some leading indicators, rather than using that time just to gather information."

Luke Ploessl
Vice President of Health and Safety, J.F. Brennan Company, Inc.

"We enjoy having the immediate feedback on how an activity stood, cost-wise. It has increased awareness of operation costs on a much more real-time basis."

Carlos Gonzalez
Vice President, Rumco Construction
ABOUT LETSBUILD

By combining the strengths of GenieBelt and APROPLAN, LetsBuild offers two products that complement each other into an end-to-end solution for the construction phase. GenieBelt focuses on the project schedule with activity planning and progress reporting live from site. Executives and managers have a complete overview of the project progress always, and on-site workers use an intuitive mobile app for progress reporting in real time. APROPLAN supports key on-site processes related to quality, safety and drawings. Teams on site no longer have to use pen and paper to perform site inspections and complete checklists – everything is digitised and automated.

"GenieBelt helps us to eliminate ‘dead documents’ that we would otherwise use, and makes our project management and communications 100% dynamic."  
Morten Malle  
Director Agricultural Production, Gråkjær

"With LetsBuild, you get an overview of the project at the office, instead of you going out to inspect every single activity that is going on, which takes a lot of time. From where I sit, I can estimate when a specific task needs to be done, I can adapt the plan accordingly, and every worker has an updated version.”  
Shoukat Naeimi  
Project Manager, Hoffmann

“We are using APROPLAN to increase the quality of our projects. Adding the planning to the equation will be a major win for our teams and clients. LetsBuild will offer a great way to [consistently] track our project and ensure the best level of quality for our clients.”  
Stephane Caillaud  
National Product Quality Director, Bouygues Immobilier

“Daily follow-up used to be a major pain on site. LetsBuild will allow our foreman and construction manager to always be on top of things and have direct access to the expertise of our planning and QHSE teams to support them without any unnecessary admin.”  
Remy Robijns  
Head of Quality-Safety-Environment, Cit BLATON
ABOUT NEWFORMA

Newforma is a project information management (PIM) software company focused on making architects, engineers, construction professionals and owners more productive and successful. The Newforma PIM solution helps AECO organizations manage and share project information, drive accountability, raise transparency and streamline project delivery processes, including those surrounding building information modeling (BIM), integrated project delivery (IPD), contract management and more.

“One of the best features is the ability to photographically record design defects on site, which can then be issued instantly to the contractor or client through the web-based Info Exchange.”
Muhammed Ibrahim Warda
Architect and Coordinator, Architects 61

“Some people keep every email from previous jobs on a backup hard drive. Newforma Project Center makes this workaround unnecessary because Newforma allows us to file project email with other project documents without duplication, and to be able to find it again later with ease.”
Lars Holte
Project Manager, BergerABAM

“We can reference RFIs, we can reference submittals, we can reference our complete document set, including the specification, right there in the field. That has made a big improvement.”
Jill Rothenberg-Simmons
Principal, Stantec

“One of the major risks associated with a construction project is delay of project completion. Newforma shortens response times and creates a concise record that is hard to dispute, thereby mitigating risk.”
Patrick McAleese
Senior Vice President, WSP

ABOUT RAKEN

Raken provides innovative mobile technology to streamline field workflows for construction workers. Raken’s “digital toolbox” connects the field to the office with daily reports, production tracking, time cards, toolbox talks, project insights, photo management, and more. Thousands of the world’s top construction companies use Raken to solve their field reporting needs.

“Raken is a one-stop shop for time, comments, and photos. It definitely improves what you know about what’s going on with all the jobs, plus it’s easy to use.”
Pat Redinger
Office Manager and Estimator, Stonwerk

“With Raken the guys are easily, by cost code, putting in their hours and it has totally streamlined our payroll.”
Robb Mayers
Chief Executive Officer, Outlier Construction

“Very streamlined, very simple, and moreover it allows me to put together sequences that tell a story, finish topics, and allow me to do my job out here in the field.”
Dave Storvis
Project Superintendent, Sundt Construction

ABOUT RELATICS

Relatics is a web-based platform used by projects in the construction and civil engineering industry for requirements management and systems engineering. It frees the project of numerous spreadsheets and isolated applications. As a result, Relatics has proven to regain project control, reduce project risks, and decrease failure costs. Relatics is used by governments, contractors and consultancy firms for buildings, roads, bridges, tunnels, railways, canals, dams, ports, airports and dredging.

“We manage all information in Relatics. This approach shortens the information throughput time and, as a result, the completion time for the designs.”

Martin van Leusden
Systems Engineer, Boskalis

“We wanted to record all relevant information in a central location, rather than consulting separate Excel checklists. Relatics follows the principles of systems engineering, offering a clear hierarchy and overview. This makes information storage less error-prone and facilitates easy, transparent modifications.”

Frank Haring
The Hague Municipal Authority

“Relatics provides us with the flexibility we need to build our own workspace to control our processes. The workspaces help Ballast Nedam to achieve enduring quality for our clients and the society.”

Paul Warmerdam
Ballast Nedam

“The advantage of Relatics is that our information is now centrally managed, and accessible from every location. Employees can work simultaneously and since each user is provided with custom roles related to the information he or she is responsible for we keep overall control of the information.”

Ruud van Tongeren
Arcadis
ABOUT TRIMBLE MEP

With the ever-changing demands placed on MEP contractors to do more with less, few solution providers today have the suite of technology solutions that span the needs of the office to the field—all while helping to lower risk and allowing the contractor the ability to maintain profit margins. Trimble’s expertise in positioning technologies for mobile workforce productivity, combined with key domain knowledge in the sub-trades, enables the MEP Division to meet the large and small MEP customers need.

“"The entire team is working in Revit for design, collaboration and coordination. Without SysQue and A360, we would have been working with 2D backgrounds. Conventional practices create a layer of separation between the project team partners. The real-time coordination removes that condition allowing us to truly work together and deliver a cohesive..."

William Cameron
BIM Manager, Brown University

“We were looking to avoid interference issues with other systems and minimize time spent in the field. With SysQue and Revit, we’re able to see and correct any potential conflicts with mechanical or plumbing systems and modify the parts as needed in the virtual environment. Once designed in SysQue, the parts are ready for fabrication in our controlled...

Daniel Johnson
Construction & Virtual Coordination Manager, Price Electric

“"With AutoBid, our bids are so much more accurate. No matter the building style, whether concrete or steel, the tool automatically generates the correct number of components we need. No more guesswork.”"

Tyke Read
Engineer, Brown & Read Engineering

“"Trimble and the TX6 scanner really stood out to us because the equipment is completely focused on the construction industry and is tailored to the results we need. Another benefit is the elevator Tripod which allows the scanner to safely access confined spaces. This was a huge time saver, not to mention a much safer data retrieval method.”"

Nick Snow
Detailer and BIM Coordinator, EC Electric

“We fully embrace ConstructionSuite for all of our estimating. It has enabled us to easily estimate and manage complex projects as well as the sheer amount of detail we can share & manipulate.”

April Bettinger
Nip Tuck Remodeling

“My favorite features of ConstructionSuite are estimating and scheduling. We use these features to their full extent, which has resulted in better record keeping and better organization.”

Ryan Batchelor
Hinderliter Construction

“ConstructionSuite™ estimating allows us to break down costs into as much or as little detail as we need, and communicate with QuickBooks to track actual cost vs. estimated costs at whatever level of detail we need. This has been a game changer for us and has cut estimating time down by at least half. If you’ve tried job costing in QuickBooks, I’ve…

Michael
New World Contracting

“UDA software and employees are the BEST! Seamless integration between the office and staff in the field. With punch lists, it’s easy to check on the daily progress of our crews to keep them on time and on budget. The absolute best QuickBooks integration. We have several products that interact with our QuickBooks accounting software but none…

“I can honestly say that the features eSUB offers with document management, correspondence, and the mobile app has already paid for itself.”

Dan Tagliaferri
Project Manager, Above All Store Fronts

“Field Foreman and onsite worker adoption has been incredible since they are using Samsung tablets to run the easy-to-use eSUB platform in their daily project delivery activities. Our field staff have very diverse backgrounds, and some are not tech savvy, but there have been no complaints about the intuitive user interface, and robust capabilities.”

Mike Dague
Owner, South Bay Framing

“Information that we need will update throughout the day - I don’t have to wait for paperwork or an email, it will all be accessible through eSUB.”

Tom Hanson
Rowan Electric

“eSUB replaces manual processes with digital delivery workflow (preview, submitted, approved, etc.) to keep projects on schedule and efficiently increases employee productivity by 10-25%, per week.”

Renee McEntee
Lead Project Coordinator, Eckstine Electric
ABOUT COMPUTEREASE

ComputerEase is the leading provider of Construction Accounting and Project Management Software for Contractors. This all-in-one software is easy to use and works the way a contractor works. By investing in the brightest programming minds, ComputerEase has crafted a fully-integrated Job Costing, Accounting and Project Management solution along with field-to-office integration. More than 6,000 contractors trust ComputerEase to run their business every day.

"Job Center is excellent. RFC’s are easy to use. Spend time evaluating job center and reporting. There is a lot of great information filters that can help evaluate work in progress as well as future estimating.”

Chad
H & R Mechanical Contractors

"What I like the most is the ease of use on most of the applications, various reports and ability to create your own reports to fit company needs.”

Charlene
Benchmark Buildings & Irrigation

"It is user friendly and easily maneuvered. Just about anything you want to do or can think of doing can be done in CE. I like the "shortcuts" that make entering/typing much faster. I’m all about shortening key strokes.”

Shellie
TWC Concrete Services

"I really like the ability to drill down into the GL, the export and import features, and the ease of maneuvering within the products. I just love the products.”

E Star Electric
ABOUT FIELDLENS

Fieldlens is the only tool that takes chatter from your field crew and turns it into actionable project insights, instantly. It knows what each member of your team needs to do now and reminds them, and it gives decision makers a bird’s-eye view of every project without stepping on-site, enabling them to spot trends and see who the best performers are. Fieldlens does not digitize the same old process - it’s a revolution in communication that’s as easy to use as your favorite social apps, and powerful enough to get jobs done faster than ever before.

"I think FieldLens is a great tool to have. It saves time and money. It let’s me focus more on productivity than doing paperwork in the office.”
Nick Adams
Macon Construction

"Communication is part of our culture, and so many of our processes center around how efficiently and effectively we’ll communicate with our project team members. That’s why FieldLens has been an excellent fit.”
Keyan Zandy
Director of Operations, Skiles Group

"It’s a great resource for us. All communication stored in one place that I can easily reference from anywhere with almost any device.”
Gerard Kelty
The Nassal Company

"It’s been a very valuable communication method for our on-site progress and allows team members to be involved on several site areas at the same time.”
Sheila Winger
Wadman Corporation
ABOUT JOBPOWER

JOBPOWER provides contractors with comprehensive construction accounting and document management software emphasizing job cost management. The software combines power and ease of use with features specific to construction and contractors, features such as AIA billing, certified payroll, budget vs actual reporting, and much more, all for a great price.

"JOBPOWER is great! It works well with all of the functions we must perform such as installing and servicing elevators, paying companies for medical equipment and keeping track of inventory!"

Shannon Sparks
Romar Elevators Inc.

"JOBPOWER is the best construction accounting software I have ever used! It is user friendly, trouble-free and customized to the needs of the construction industry. JOBPOWER makes my job much easier."

Dorothy Jones
Grinder & Haizlip Construction, Inc.

"JOBPOWER is so easy to install and use. The various reporting capabilities are great and there are lots of valuable accounting and job features. Technical support phone calls are returned promptly."

Melody Abrahamson
Commercial Industrial Builders, Inc.

"JOBPOWER construction management software streamlined our daily tasks and cut down the amount of time spent on job costing."

ABOUT SYNCHRO SOFTWARE

Synchro was born from a passion to bring improvement to the construction industry. Since their beginning in 2001, the Synchro team has focused on creating a technology platform to successfully pave a path from lean manufacturing methods to digital planning and production methods, fit for the complex challenges of construction. Their award winning 4D planning and project management software, Synchro PRO, has gained a reputation around the world for improving the quality, safety and productivity of construction.

"Synchro is a very powerful tool - it is an integral part of the operations of our IPD Lean Construction team. Not only do we have the ability to play out various scenarios at different degrees of detail or scope, but more importantly, Synchro's capability to communicate sequencing solutions between our team members in a direct and effective way is an..."
Calayde Davey
Project Developer, Arnold Development Group

"Critical to the success of our project is having a tool that provides a far greater graphical representation of the sequence, extents and timing of the work being planned and communicated. Synchro has proven to be the market leader in 4-D visual planning tools that allow our project teams to be at their best."
Matthew London
Scheduling Manager, Mortenson Construction

"Bechtel's collaboration with Synchro has enabled us to quickly implement 4D planning on many of our projects, enabling more efficient and effective execution through cross-functional problem solving. The Synchro team has been extremely supportive and responsive throughout implementation."
David Wilson
Chief Innovation Officer, Bechtel

"Project teams, including foremen and craft workers, are able to not only see the schedule in action, but because Synchro PRO has both an integrated CAD functionality and a CPM scheduling engine, we can analyze and correct the schedule as deficiencies are observed."
Mark Hedges
Digital Asset Creation Manager, MWH Global
